**Subject:** City of Los Angeles letter of consideration from Verizon  
**CC:** "Cooksey, Julia" <julia.r.cooksey@verizon.com>

Good afternoon Clayton,

Per your instruction below is the letter of request from Verizon. I will see you tomorrow morning at our scheduled meeting.

Thank you,

Julia Cooksey

April 20, 2009

Mr. Gary Harris  
 Chief Investigator II  
 Investigation and Enforcement Division  
 Department of Public Works  
 Bureau of Street Services  
 City of Los Angeles  
 1149 S. Broadway, Room 350, L.A. 90015

Dear Mr. Harris:

As discussed in the meeting on April 2, 2009 with the City of Los Angeles. Verizon would like to request the City of Los Angeles consider our request for installation and placement of our pole mounted fiber distribution hubs (FDH) in a side-mounted configuration to better align with other cabinets and/or appurtenances within the right of way and at lowest position possible on the pole while maintaining a minimum height of 2.5 feet above existing grade.

This request meets the City of Los Angeles's and Verizon's needs as follows:

- Mounted hubs placed at this height will allow free and safe passage of pedestrians along the street, sidewalk, or parkway
- Placing hubs at this height will fall within the existing City Ordinance
- Potential safety-related risks for Verizon technicians will be eliminated because ladders will not be required at this "working" height
- Should any individual circumstance arise, a Verizon customer contact number would be visible on every individual FDH placed

Thank you for your consideration. Verizon is committed to providing the most advanced high-speed services to the residents of the City of Los Angeles with our fiber to the premise project.

If you have any questions or need additional information, please contact me at 310-266-7725, [julia.cooksey@verizon.com](mailto:julia.cooksey@verizon.com).

Julia Cooksey
